

Kinases have long been targeted by researchers in drug discovery to understand the underlying mechanisms of many different cancers. Blocking or activating these enzymes can lead to perturbations in pathways responsible for proliferation, apoptosis, differentiation and metastasis.

Popular Kinase Targets

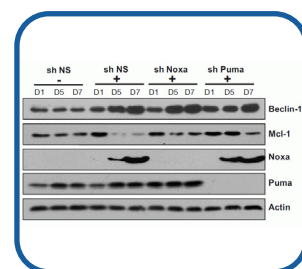

RTK | GRP-RAS | BRAF | MEK | ERK1/ERK2

Featured Products

Product	Cat. No.	Clonality	Host	Applications
RIPK3 Antibody	2283	Polyclonal	Rabbit	E, IF, IHC-P, IP, WB
MEK1/2 Antibody	8207	Polyclonal	Rabbit	E, IF, IHC-P, WB
CALM1 Antibody [42C9]	13-792	Monoclonal	Rabbit	IF, IHC, IP, WB
ERK2 Antibody, KO Validated	13-090	Polyclonal	Rabbit	IHC, WB
B-raf Antibody	5777	Polyclonal	Chicken	E, WB
B-raf Antibody	7379	Polyclonal	Rabbit	E, IF, IHC-P, WB
EGFR Antibody, KO Validated	13-994	Polyclonal	Rabbit	IF, IHC IP, WB
EGFR Antibody	60-735	Polyclonal	Rabbit	IHC-P, WB
PTEN Antibody	3517	Polyclonal	Rabbit	E, IF, IP, WB
PINK1 Antibody	7859	Polyclonal	Rabbit	E, IF, IHC-P, WB
PIK3C3 Antibody	7891	Polyclonal	Rabbit	E, WB
VEGFB Antibody	14-581	Polyclonal	Rabbit	IF, IHC, WB
PDGFRA Antibody	63-117	Polyclonal	Rabbit	IHC-P, WB
TOR Antibody	3485	Polyclonal	Rabbit	E, ICC, WB
Raptor Antibody	3493	Polyclonal	Rabbit	E, ICC, IF, WB

Immunohistochemistry Validation of RIP3 in Fadd KO mice (Zhang et al., 2011)

KD Validation of PUMA (3041) in HOSE-RasV12 Cells (Elgendy et al., 2011)

Research Biosimilars

Product	Cat. No.	Immunogen	Source
Coprelotamab Antibody, Monoclonal	21-895	Humanized /ERBB2	CHO cells
Demupitamab Antibody, Monoclonal	21-900	Homo sapiens / EGFR	CHO cells
Mipasetamab Antibody, Monoclonal	21-932	Humanized / AXL	CHO cells
Zilovertamab Antibody, Monoclonal	21-995	Humanized / ROR1	CHO cells
